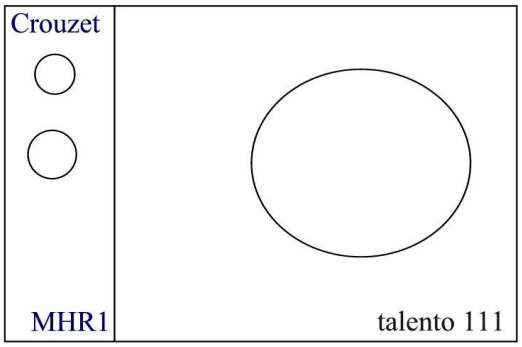
User's manual AS6

With The AS6 it is possible to switch for example pomp or a co2 machine. The maximum power output ; 1350Watt / 6Amps.



Clock talento 111

Plug in you're AS6. First you have to program the time on the clock. Now we can set the time you want you're pomp to switch on. You can do this by pushing the purple dip switch's to 1. Don't forget to make sure that the grey switch in the top right hand corner is set on clock (middle).

Delay timer Crouzet MHR1

With the MHR1 you can set how many seconds you want the pomp to switch on. With the top button you can set the factor and the bottom button you multiply. For example; you set the factor on 6-60 seconds. The bottom button on 3.
Sum = 3 x 6 = 18 Seconds

The output is fused at 6 Amps. Not suited for switching lamps!

Notes

ELF ELECTRO can not be liable for any damage using the AS6
